COMMISSION

Brussels, XXX
[...] (2026) XXX draft

ANNEX

ANNEX

to the

Commission Implementing Decision

laying down rules for the application of Directive (EU) 2024/2881 of the European Parliament and of the Council as regards the requirements for projections provided as a reason for postponement of the deadline for attaining compliance with the limit values for certain pollutants and information to be included in implementation reports

ANNEX Information to be included in implementation reports referred to in Article 5

A. General information on the air quality zone and the postponement concerned:

1. air quality zones to which the implementation report refers;
2. air pollutant and air quality standard concerned;
3. end date of the postponement concerned;
4. reporting period covered by the implementation report and its date of adoption;
5. concentrations observed during the reporting period at all sampling points in the air quality zone, expressed in metrics relevant to the air quality standard to which the postponement applies.

B. Status of implementation of measures in each air quality zone to which the postponement would apply:

1. a detailed update on the progress made in implementing the specific measures and the actions outlined in the air quality roadmap;
2. information on additional measures or any administrative or legislative steps taken at national, regional or local level to reduce concentrations of the air pollutant concerned, if applicable.

C. Assessment of progress and updated projections:

1. a comparison of the results of the projections put forward in the air quality roadmap that was the basis for the postponement and the measured concentrations for the same year or years and, where the measured concentrations are higher than those projected in the air quality roadmap that was the basis for the postponement, an explanation of any difference observed;
2. for implementation reports drawn up as from 1 January 2035, evidence that the concentration levels for the relevant pollutant show a general decreasing trend in line with an indicative trajectory towards compliance estimated in an updated air quality roadmap established pursuant to Section A, point 7(e), of Annex VIII to Directive (EU) 2024/2881;
3. updated projections of emissions and, where possible, of concentrations to confirm if the postponed attainment deadline is still realistic and if progress in reducing concentrations is on track to meet that deadline;
4. where applicable, information on additional measures or adjustments to the existing strategy, such as the indicative measures listed in Point B of Annex VIII to Directive (EU) 2024/2881, that are being considered in the event that progress is found to be slower than the original roadmap predicted.
